Alphabetical Index	43

Arcon type articulator *Arquimedes professional* (semiadjustable) **A7 PLUS**

Ref. 010099
Articulator + Case

Sturdy structure made of aluminum, ensuring greater stability. Design that provides greater visibility.

- Semi-adjustable / Arcon.
- Fixed intercondylar distance (110 mm).
- Curved condylar guide.
- Angle adjustment of the condilic guide.
- Angle adjustment of the Bennet guide.
- Central locking.
- Motion stabilizer system with silicone joint.
- Upper branch support pin in the open position.

Arquimedes protrusal arcon type articulator (semiadjustable) **A7 PLUS-E**

Ref. 010103
Artikulator + Box

Similar to the Archimedes Pro model, it has exclusive aluminum condylar guides with millimeter adjustment.

- Semiadjustable / Arcon.
- Fixed intercondylar distance (110 mm).
- Regulable condylar guide.
- Regulable Bennet angle.
- Flat condylar guide.
- Bilateral locking system.
- Support for upper branch in open position.
- Stabilization system of the condilar guide movement with spring.

Arcon type articulator *4.000 S* (semiadjustable)

Ref. 010107
Articulator + Case

- Semi-adjustable / Arcon.
- Fixed Intercondylar distance (110 mm).
- Condilar guide fixed on the average: 30°.
- Bennet angle fixed on the average: 15°.
- Condilar curve guide.
- Motion stabilizer system with magnet for the condylar guide.
- Upper branch support pin in the open position.

Arquimedes Junior (semiadjustable) **A7 FIX**

Ref. 010098
Articulator + Cardboard box

- Semi-adjustable / Arcon.
- Adjustable intercondylar distance in (expander spindle).
- Curved condilic guide.
- Condilic guide angle adjustment.
- Bennet angle adjustment
- O-ring stabilization system.

Standard facial bow

Medical device

Ref. 010102-50
Bow Standard

The Standard face bow is an instrument to record the spatial position of the patient's upper arch and transfer it to the articulator. The transfer of this position is by attaching the complete facial bow to the articulator.

Elite facial bow

Medical device

Ref. 010100-55
Bow Elite

The Elite face bow has a fork articulation and fixation system that allows a faster registration for the professional and comfortable for the patient, besides a transfer set that eliminates the need for the arch in the process of assembling the models in the articulator, making this process more practical and stable.

His nazium rapporteur with adjustable height allied to the infra-orbital indicator, makes the record even more precise.

The bow is equipped with a smooth sliding system (opening and closing) that facilitates its handling. Its atria are anatomical, removable and autoclavable.

Dappen glass support Ref. 070165

45 mm DIMENSIONS
110 mm
125 mm 0,308 kg

Completely manufactured in polished stainless steel with transparent silicone legs to avoid sliding. It is very useful and convenient to organize the worktable. It has 6 different cavities for glasses. (Glasses not included).

Top quality mirrors meeting all THE required standards. They all are plane with stainless steel chassis. They are available in silver (normal) and rhodium. In the case of rhodium, reflecting surface is in the upper part of the mirror, so that light does not have to make two changes of element (air/glass; glass/air) creating different refraction angles. As a result the image is more clear and with no distortions. There are four different sizes: Plane n°3, n°4, n°5 and n°6. These also have two kinds of thread: cone socket and simple stem.

	Plane	Normal	Rhodium
Cone socket	N° 4	070551	070560
	N° 5	070552	070561
	N° 6	070553

Ref. 050130=SG Ref. 050140=IG

Ref. 050110=SP	0,080 kg
Ref. 050120=IP	0,083 kg
Ref. 050130=SG	0,092 kg
Ref. 050140=IG	0,094 kg

INSTRUCTIONS FOR USE

1. Fit the base former with the metal plate.
2. Empty the impression as usual.
3. Insulate the model and fit the magnet on the metal plate.
4. Make the counterform that will remain fixed in the articulator by pouring coating plaster on the model; let it polymerize. Then separate the model carefully from the counterform (which can be reused for another model).

Model tray

(10 units each colour)

Useful when organizing Dental Lab production. Labels can be put on the frontal part and there is a spring to hold specification sheets.

These trays can be hung on the wall by a rail. (Ref. 100060) There are 5 colours available: yellow, blue, red, green and white.

They are supplied in packs of 10 units each colour.

Yellow	Ref. 100050
Blue	Ref. 100052
Red	Ref. 100054
Green	Ref. 100056
White	Ref. 100058

Model tray large

(10 units each colour)

Similar to the previous model, but larger.

Disposable trays (100 units) with retention Ref. 100222

Made of a very resistant plastic, and therefore rigid and non-deformable. Thanks to their anatomic design and to the different sizes and shapes available (10 options) they can be easily adaptable to any patient. They feature inner retention to prevent unwanted movements of the alginate. Besides, their base has several cuts so that -if necessary- windows can be easily opened with a drill, thus avoiding the implant posts.

Holder for

10 dental film clips Ref. 070192

It simplifies the operation and handling of up to 10 dental films. Completely made in stainless steel.

(L) 205 x (W) 65 x (H) 22 mm	0,065 kg
------------------------------	----------

X-ray viewers (flat)

DIMENSIONS	Vision area:	Outer area		
Ref. 100131 DIN A4	300 x 210 mm.	360 x 240 x 20 mm.	Wall and tabletop	1,700 kg
Ref. 100132 SRA3	430 x 355 mm.	510 x 495 x 23 mm.	Wall and tabletop	3,076 kg
Ref. 100134 DIN A2	580 x 400 mm.	700 x 520 x 33 mm.	Wall	4,000 kg

X-ray viewers with a high brightness (3500 Lux) cold-light screen. This technology also features a low power consumption and a practically unlimited duration (10000 hours minimum).

Model Ref. 100132 has a large SRA3-size LED-backlit screen on which large-format films can be viewed. It also has light intensity regulation and two types of operation: automatic, when the film approaches the device turns on without pressing the button; switched on by pressing the button.

X-ray viewer Ref. 070460

Supplied with 30° inclined tripod. Can also be placed horizontally or screwed to the wall. Includes a system of springs by which the cover can hold the plates. Size 400 x 200 mm.

DIMENSIONS

(L) 410 x (W) 200 x (H) 88 mm	4,032 kg
(L) 515 x (W) 350 x (H) 290 mm	4,500 kg

Dose measuring spoon

Ref. 100270

PROVEN: save 20-40% on plaster

Precision scale

Ref. 100041

0.1 g resolution, maximum load of 3000 g, and "piece counting" function, very useful to count small elements such as pins, etc.

Ref. 100040

0.05 g resolution in the weight rank of 0-1000 g, and 0.1 g in the rank of 1000-2000 g.

Ref. 100042

Precise resolution of 0.1 g and high weighing capacity (1000 g).

Ref. 100040	(L) 150 x (W) 110 x (H) 36 mm	0,286 kg
Ref. 100041	(L) 248 x (W) 248 x (H) 100 mm	0,774 kg
Ref. 100042	(L) 300 x (W) 190 x (H) 55 mm	0,446 kg

Mulhacén Trimmers

Ref. 080093

Ref. 080095

Warning light

Mulhacén model trimmers Ref. 080093 Ref. 080095 *Diamant*

Modern and versatile model trimmer. It features a powerful 1600 W motor with integrated brake, opening lid for easy access to the disc, operation warning light, discs with hook-and-loop type (Velcro®) fastener, sophisticated cleaning system, adjustable worktable... and an endless list of elements which make it –probably– the most complete model trimmer in the market. Unbeatable quality/price ratio.

Mulhacén model trimmer DRY

Mulhacén model trimmer DRY Ref. 080096

The main characteristic of the trimmer is that the surfacing operation is performed dry.
-Stability of the material to be trimmed, since it is not wet.
-Higher performance and longer life, minimal effort.

OPTIONAL EXHAUSTER (ESSENTIAL).

OPCIONAL:

Ref. 080539

Ref. 080538

- Hook-and-loop (velcro®) type abrasive disc. High cutting power and very easy to replace.

(L) 400 x (W) 530 x (H) 440 mm 13,500 kg

Conforms to UL Std. 61010-1.
Cert. to CSA-22.2 No. 61010-1-12.

- Easily removable cover (wide-opening hinge). Easy to clean and easy access to the disc.
- Made of very strong technical plastics.
- Corrosion free

Accessories

- 1 Ref. 080093-04 (5 u.) 80 grit abrasive disc (coarse)
- 2 Ref. 080093-05 (5 u.) 120 grit abrasive disc (fine)
- 3 Ref. 080093-55 (1 u.) Diamond disc
- 4 Ref. 080093-65 (1 u.) Silicon carbide disc Ø 250 mm

CAUTION!

Diamond discs are very heat-sensitive: do not trim or rectify metal pieces or coatings.

Serantes model trimmer

Sandpaper disc trimmer

Ref. 080097

Diamant disc trimmer

Ref. 080098

Sandpaper disc - DRY trimmer

Ref. 080099

Ref. 080097

Ref. 080098

Ref. 080099

Ultra compact. It may be the trimmer currently on the dental market, with smaller dimensions. The concept of him derives directly of the **Mulhacén model (080093)**, with which it shares many of its performance and characteristics, except for dimensions. In this sense we can speak of a powerful 1600 W motor with integrated brake, lid with easy opening to access the disc, discs with easily changeable hook / loop type fixation, water cleaning system, high resistance composite manufacturing and of course no corrosion, etc.

Ideal for general dental applications and especially for those environments in which the user does not have much space, but who nevertheless does not want to give up the possibilities that a completely professional trimmer offers in terms of productivity and quality: the size of the table and window have been studied so that it can be used in jobs similar to those carried out on larger trimmer models.

The Serantes trimmer is supplied in three different versions, all of them with a hook/loop disc fixing system:

- With a choice of conventional 80 or 120 grain abrasive disc. General purpose version ideal for any dental user.
- With diamond disc: Designed for demanding environments in those that speed and productivity are key aspects.
- Dry, without water circuit: Designed for environments where the water supply and drainage are difficult to install or for professionals who do not want to wet the models.

Serantes is fully compatible with the MESTRA range of decanters. Supplied with 2 sandpaper discs.

SPECIFICATIONS

Voltage	230 V - 50-60 Hz
Rated power	1600 W
Disc diameter	235 mm
Speed	3000 rpm
Dimensions	(L) 385 x (W) 285 x (H) 332 mm
Weight	10,2 kg

Accesorios

- 1 Ref. 080097-08 (5 u.) Sandpaper disc coarse grain - 80
- 2 Ref. 080097-09 (5 u.) Sandpaper disc fine grain - 120

CLASIC Trimmers

Ref. 080082

Ref. 080083

 (L) 330 x (W) 570 x (H) 400 mm  24,000 kg

3000 rpm. Trimmer (silicon carbide disc) Ref. 080082

It is the model that best meets the requirements of the dental lab. Its trimming power is very high, and it can cope with a heavy workload in a very short time. Recommended for experienced professionals working in places where a little more noise or splashing is not a problem.

Diamond disc trimmer Ref. 080083

Identical features of the previous model, but with a diamond disc.

Ref. 080080

Ref. 080081

1500 rpm. Trimmer (silicon carbide disc) Ref. 080080

Due to its low speed, the main advantage of the trimmer is its easy handling, its silent operation and the scarce splashing it produces. Thus, it is recommended for professionals not very familiarized with trimming who work in places that have to remain clean or in places where they cannot make too much noise.

Diamond disc trimmer Ref. 080081

Similar features of the previous trimmer, but with a diamond disc. The diamond disc, if used properly, has a much longer working life. Besides, the trimming surface is maintained completely flat, with no wear scratches. Its price, however, is higher.

Model trimmer CLASIC DRY

RDS-1 trimmer Ref. 080084 DRY

The main characteristic of the RDS-1 trimmer is that the surfacing operation is performed dry, with a diamond disc at 1.500 r.p.m.
-Stability of the material to be trimmed, since it is not wet.
-Higher performance and longer life, minimal effort.
OPTIONAL EXHAUSTER (ESSENTIAL).

Silicon carbide disc Ø 250 mm

Ref. 080080-03

Diamond disc Ø 254 mm

Ref. 080081-01

All diamond disc Ø 254 mm

Ref. 080079-05

CAUTION!

Diamond discs are very heat-sensitive: do not trim or rectify metal pieces or coatings.

Decanter (19 l.)

Ref. 080085

Made of resistant polypropylene. It has been specifically designed for a quick and easy cleaning, since dirt is collected in a plastic bag. The lid closes hermetically and prevents the spread of bad smells. Its size and shape have been designed for the unit to be easily installed under the sink.

(Ref. 080085-02)

Eolo Induction aspiration unit Ref. 080533

Its new "brushless" induction motor extends its useful life between 5 and 10 times compared to traditional models, and has an innovative double filter system optimized for work in the dental clinic (including abrasives such as rust aluminum). It can be mounted with HEPA filter.

The electronic control with LCD screen is equipped with protection systems against overloads or obstructions in the suction mouth and with a visual indicator of the filter filling level and the detection of the micromotors. It allows manual or automatic operation synchronized with up to 3 different devices (sandblasters, micromotors, etc.).

The detection and adjustment of micromotors is carried out by the electronic control itself, which allows detecting any micromotor, including those of the "brushless" type.

Ciclón dust decanter

Ref. 080535

It is a simple device to be connected to the inlet pipe of a conventional Aspiration Unit for pre-filtering dust particles. The air circulates along a circuit that makes the dust particles fall into an inner tank. More than 99% of the aspirated dust and dirt is removed, reducing the risk of obstruction of the aspiration pipes and making the working life of the aspiration filters considerably longer. The dust tank is easily accessible and, therefore, cleaning the device is a comfortable and simple task. The device features anchoring elements especially adapted to MESTRA's EOLO aspiration, with which it makes up a high performance compact unit.

CICLÓN is built in high resistance polypropylene.

Sirocco suction units

It is difficult to find a manufacturer in the dental sector that offers such a wide range of professional suction units as the Sirocco family, covering any possible need that may arise with the most suitable model for each case.

In addition, the modular and scalable nature of this range provides solutions for both clinical and laboratory use, allowing the user to choose from a multitude of options, such as unit size, arm type, filtering system, etc.

Although the number of alternatives and accessories is enormous, all units follow the same script: they are extremely quiet, aesthetically appealing suction units incorporating powerful induction motors (with a longer life than traditional models) and very economical consumables, with the level of quality that MESTRA guarantees in all of its products.

Induction motor (brushless)

Efficient low-noise suction (55 dB)

Strong suction power

Easy removal and cleaning of the reusable filters

Sirocco S Ref. 080534

Suction especially suitable for clinical and laboratory environments, it is the perfect size for desktop use and has a sleek aesthetic.

The Sirocco S model incorporates two stages of filtration: a first circular HEPA (High Efficiency Particulate Array) filter and a second internal HEPA filter. Thanks to its efficient design, the filter change operation is extremely simple.

The unit also features an external micromotor detection system and seven different power levels.

- Powerful induction motor
- Intuitive "touch" keypad
- Easy to use and change filter
- Exceptionally quiet

SIROCCO S TECHNICAL CHARACTERISTICS

- Comfortable and practical armrests

Height 365 mm • Width 345 mm
Depth 400 mm • Weight 5.5 kg

Finishing box that is fully compatible with the Sirocco M and L suction units with which it forms an extremely useful and reliable tandem for a clinic and laboratory environment, allowing small polishing and refinishing operations.

Ref. 080534AL

Sirocco M y L Ref. 080536 - Ref. 080537

These are two robust, quiet and highly reliable suction units, the M model being particularly practical for use under the workbench and the larger capacity L model very useful in CAD/CAM suction systems.

Its brushless motor extends its service life by five to ten times compared to traditional models.

They incorporate a connection for an external micromotor and a milling machine that will operate synchronously with the suction unit. In addition, its ergonomic design with handles and wheels facilitates its use and mobility in the clinic and laboratory.

Depending on requirements, you can choose to use disposable bag filters or reusable HEPA1 filters, or even a ULPA2 filter, as well as three different arm types; flexible hose for connection to other devices, swivelling snake arm or articulated arm, which are also equipped with different suction hoods.

- Extensive set of fully compatible accessories
- Exceptionally quiet operation
- Easy to use and change filter

Alginate mixer Ref. 080515

Ref. 080515-02

Bowl	750 cc
Diameter	130 mm
Height	110 mm
Weight	0.2 kg

CE Medical Device
MDR 2017/745

Useful tool when making alginate paste in the dental clinic. Its operation is easy: just place powder and water in the bowl and select the rotation speed (fast/slow) by pressing the button. While rotating, the user can mix the paste with a spatula till it reaches the appropriate consistency and texture.

The user can control visually the process at every stage, and this guarantees that the paste made is in optimal conditions for application. In order to make cleaning easier the bowl is detachable. It is factory supplied with a bowl and a special plastic spatula.

Height with bowl	230 mm
Width	175 mm
Depth	250 mm
Weight	3 kg
Power	60 W

(L) 300 x (W) 310 x (H) 195 mm 3.9 kg

Automatic mixing alginate Ref. 100191

Just fill the bowl with alginate and water, put it into the machine, press the button, and in a few seconds you will achieve a completely homogeneous mixture, ready for use.

Silent, small, comfortable and above all economical and reliable. Factory supplied with a bowl set, a plastic spatula and a practical water dispenser. It can also be used as plaster mixer with astonishing results.

● **MAXIMUM MIXTURE**
80 grs. Alginate + water

The machine is factory supplied with four bowls, a practical water dispenser, a mixing stick, a spatula and a holder.

Height	305 mm
Width	205 mm
Depth	265 mm
Weight	17 kg

(L) 220 x (W) 155 x (H) 200 mm 0.6 kg

Suitable for 99% of silicones

Silicone mixer Ref. 100360

Impression material mixer simple, fast, reliable and safe. With small size to be located anywhere in the laboratory. The cartridge insertion / removal operation is easily performed within a few seconds.

The mixer has three adjustable pouring speeds to cover the needs of each job.

Its amazing sturdiness together with the power of its motors generate a totally fluid mass, with optimum viscosity and totally free of bubbles without any effort.

All this means reduction of time, material and the improvement of the quality of the works.

Compatible with almost cartridges type 380 ml present in the market.

Height	290 mm
Width	170 mm
Length	250+150 mm
Weight	7.1 kg
Temp. environment	5-40 °C
Supply	240 V 50 Hz

Push	450 kg +-10

Vacuum forming machine Ref. 080542

It is cheap, easy to use and has an attractive design. It has a powerful aspiration motor with automatic connection when the sheet holder goes down. The carbon heater allows a progressive and uniform heating of the material that is going to be formed. It can be used with square sheets. Is supplied with a plane model holder and with a basket that can be filled with grit (a can is included with the machine) so forming depth is reduced.

Sheets \square from 120 to 131 mm
 Sheets \circ from 125 to 134 mm

 (L) 300 x (W) 270 x (H) 430 mm  6 kg

Height	310 mm	Weight	4.6 kg
Width	275 mm	Power	925 W
Depth	260 mm		

Thermoforming sheets

Standard square thermoforming sheets of 127 x 127 mm.

Made of high quality plastic with FDA approval and CE marking certifications.

There is no soot, nor fumes during the heating. As they do not contain recycled materials, they do not tear while subjected to vacuum.

They are available in a wide range of thickness and types.

Drying oven Ref. 080118 for thermoforming sheets

- A fan circulates the hot air producing a uniform drying.
- Draws out moisture and keeps dry thermoforming sheets, to avoid the formation of pores.
 - Instrument drying.
 - Drying of plaster models, etc.
 - 6 stainless steel trays.
 - Stainless steel housing.
 - 24 hour timer.

Height	310 mm
Width	340 mm
Depth	450 mm
Weight	8.3 kg
Power	550-650 W
Temperature	35-75°C

Water bath Ref. 080078

This machine is extremely useful when working with applications that need a water bath that keeps the water temperature accurately (polymerisation of small elements, wax sheets for biting registers, etc).

It has a 1 litre stainless steel tank and it is easy to clean.

The body is made in high density polyurethane, resistant to chemical agents.

Bath temperature control is made by an electronic thermostat easy to use and accurate when keeping the programmed temperature.

Temperature range is from 30°C to 75°C. A powerful heater allows reaching the set temperature in a few minutes.

- Ref. 110330
- Ref. 110340

Family of four compressors consisting of two sizes of 80 and 160 litres/minute to which a dryer with automatic drain can be coupled.

Extremely quiet operation (60 dB), easy maintenance (dry piston) and excellent reliability. They are supplied with two pressure gauges (boiler and service pressure), outlet pressure regulator and complete set of valves for draining. The service pressure can reach 8 bars.

Ref. 110300

Ref. 110310

Ref. 110330

Ref. 110340

- The models with dryer are also available with HEPA filter (H14) Ref. 110310H and Ref. 110340H.
- The activated carbon filter Ref. 110300-53 is available as an accessory for all compressors.

How do I know if my compressor complies with the European safety regulations?

It is easy to find dental compressors made in the East that do not comply with current European safety regulations. For this reason, it is advisable to check its features and security stamp: it is a plate welded to the tank similar to the attached picture. Next to the CE mark, you can see the number of the Notified Body that has validated its adaptation to European standards.

Wet ring suction unit Ref. 100345

Designed for a simple and reliable operation, the unit gives a quick response: it detects the start-up signal and reaches the optimum vacuum level in a record time. Its operation is extremely silent and it does not need any maintenance, since this technology automatically separates the air and the water with debris.

The suction power is always kept stable, with no noticeable ups and downs or failures. The unit is useful for intensive use workplaces, or for two workplaces in case of moderated use.

Calypso ultrasonic cleaner Ref. 080422

The "Calypso" model is a last generation Ultrasonic Cleaner that includes the latest innovations: Sandwich type transducers, with 100 W real power transmitted to the tank; working frequency of 40 KHz, representing an optimum compromise between sonority and cleaning power; electronic time control run by a microprocessor, with digital display and warning acoustic signals; automatic heating system of the cleaning liquid; high density polyurethane body, a material resistant to chemical agents; tank of 4 litre capacity and waste pipe; etc.

All these characteristics are complemented by an attractive line of careful design.

The machine is supplied with the following accessories:

- A stainless steel basket for equipment cleaning.
- A glass for cleaning of little instruments and its support.
- A lid that eliminates the noise while working and prevents dirt coming into the cleaner.
- BuRef. cleaner tweezers (MESTRA Ref. 070520).

Ultrasonic bath 5.8 l

Ref. 100152

Made of stainless steel: high resistance to wear and tear and long service life. Easy-to-use digital time control. It has a drain on the side. Time from 1 to 99 minutes. Temperature from 1 to 80 °C. Suitable for cleaning 3D printed models with resin.

Ref.	100150	100152
Power ult.	120 W	180 W
Power cal.	100 W	200 W
Capacity	2.800 ml	5.800 ml
Frequency	40 khz	40 khz
Height	245 mm	290 mm

Depth	165 mm	180 mm
Weight	3.98 kg	5.4 kg

(L) 240 x (W) 345 x (H) 310 mm 4.5 kg

Ultrasonic bath 2,5 L. Ref. 100140

Very comfortable and practical for cleaning small objects in the Dental Laboratory and Clinic. Its 2.5-litre capacity tank is the right size for holding the most commonly used dental laboratory instruments. It has a heating system and an electronic timer.

(L) 360 x (W) 275 x (H) 240 mm 3,500 kg

Voltage	230 V 50/60 Hz
Power	80 W
Capacity	2500 ml.
Frequency	35 khz

Ultrasonic bath, 3 L. Ref. 100142

For cleaning small objects in the laboratory and dental practice. With detachable cable, drain valve and hose. Includes plastic protective basket and drain hose.

Voltage	220-240 V	Capacity	3000 ml
Power	150 W	Frequency	36 kHz

Ultrasonic bath 1.4 L. Ref. 100141

Essential machine in both Dental Lab and Clinic. Real power of 60 W. that guarantees an excellent cleaning power. It has an electronic timer with 7 segments display.

(L) 430 x (W) 270 x (H) 270 mm 2,500 kg

Voltage	230 V 50/60 Hz
Power	60 W
Capacity	1400 ml
Frequency	42 khz

Ultrasonic baths

(mini) Ref. 100144

Voltage	230 V 50/60 Hz
Power	21 W
Capacity	140 ml
Frequency	42 khz

(for denture cleaning) Ref. 100160

Batteries not included

Voltage 2 batteries AA

Intraoral camera (autofocus) Ref. 100335

High resolution with 2.000.000 pixels. Autofocus function. WIFI image transmission. 15 inches LCD screen. Camera holder.

(L) 420 x (W) 100 x (H) 410 mm 3,900 kg

Whitening lamp Ref. 100340

Wide lighting range (from 420 to 472 nm) and high power (up to 2000 mW/cm²). Easily adjustable in height and orientation due to its practical curved arm. Its digital display shows the power, times, etc. of the whitening process. It also has a remote control. It is factory supplied complete, ready for use, and with 20 disposable mouth splints, two protection goggles, and a lip retractor.

(L) 615 x (W) 350 x (H) 300 mm 7,000 kg

Whitening lamp Ref. 100341

- Wide spectrum of illumination.
- 5 Blue lights: from 430 to 490 nm.
- 2 high power Red lights: 610 to 650 nm.
- 3 different types of LED light sources: blue, red, (red + blue).
- Light output power: up to 2,327 mW / cm.
- 8 purple lights with sterilization effect.
- Made of metallic material, in appearance elegant and easy to assemble.
- Adjustable bleaching time.
- Power supply: 100-240 V, 50/60 Hz.

(L) 670 x (W) 400 x (H) 300 mm 21,2 kg

Endodontics motor (wirelessly)

Ref. 100350

Optimized design for user interface
Ergonomic and compact body.
5 memory programs.
From 100 to 600 r.p.m.
Auto and Autostop inverse functions.

Maximum	100-600 rpm
Torque	1-4 N.cm
Power	230 W
Power supply	Battery

(L) 240 x (W) 170 x (H) 80 mm 0,725 kg

Apex locator Ref. 100330

Automatic calibration, LCD display clear and accurate image.
Different colours.
Sterilizable accessories.
Rechargeable battery.

(L) 230 x (W) 155 x (H) 112 mm 0,800 kg

Gutta Percha Cutter

Ref. 100349

The tip is flexible design to let you cut smoothly.

Press the power button and the tip can heat up to 500 °C immediately.

Release the power button and the tip can cool down fast.

Put tip cap back after using.

Put GP Cut back on stand base.

Voltage	2 AA batteries (DC 3V)
Temp. Reach	Over 500 degree
Cool down period	Less than 1 second
Stand base size	3 cm x 2.5 cm
3 Tips	(L: 2.0 mm; M: 1.2 mm; S: 0.5 mm)

(L) 180 x (W) 70 x (H) 35 mm 0,122 kg

D3 tabletop ultrasonic scaler

Ref. 100313

(Scaling-Periodontics)

Voltage	100-240 V 50/60 Hz, 30 VDC
Power	3-20 W
Frequency	28 +-3khz
Pressure	0.1-5 bar (0.01-0.5 MPa)

(L) 375 x (W) 305 x (H) 115 mm 2,620 kg

D5 tabletop ultrasonic scaler

Ref. 100316

(Scaling-Periodontics-Endodontics)

Voltage	100-240 V 50/60 Hz, 30 VDC
Power	3-20 W

Device to keep composite syringes warm

SPECIFICATIONS

Height	135 mm
Width	97 mm
Depth	110 mm
Weight	0,742 kg
Temperatura	40-50 y 70°C
Diameter of holes	16 mm
Voltage	100-240 V

LED C. curing light

Ref. 100320

Battery powered, it has a desktop base/charger, with no uncomfortable cables in the lamp. Its surprising lightness makes it a very pleasant working tool.
The optical fibre tube is very easy to dismount and sterilize.
The light pulses can be regulated in four different ways.

Voltage	100-240 V 50/60 Hz
Light output	850-1000 mW/cm²
Weight	0,120 kg
Size	263 x Ø 23 mm

(L) 230 x (W) 75 x (H) 170 mm 0,639 kg

Biological spores incubator

Simple and easy to use spore incubators. They are essential to carry out the necessary tests that confirm the proper performance of the sterilization devices. Two models are available: Elite, with digital display and adjustable temperature; and Practic, very functional and economical. Both have four cameras to be able to perform as many verifications at the same time. The Elite model also has a screen that indicates the temperature at which the test is performed and the time remaining until it ends. Its electronic control also alerts of anomalies such as power outages to avoid incorrect results.

Both devices perform the test at 57.5 °C, although the Elite model also allows operation at 35 °C depending on the type of spores used.

35 °C +- 2,5 °C for Bacillus Subtilis
57,5 °C +- 2,5 °C for Geobacillus Stearothermophilus

Inox

Tank for distilled water

Ref. 080620

A tank specially designed for the storage and supply of distilled water under pressure in the dental sector. Made of stainless steel, it features a pressure regulator and a double safety valve. Before filling the tank, it must be properly cleaned and sterilized. Do not use detergents containing hydrochloric acid, hypochlorous acid, etc. Pressure: 5 bar. Conection: Ø 6 mm. Made of stainless steel, it features a pressure regulator **and a double safety valve.**

Height	680 mm
Width with pressure regulator	255 mm
Diameter	225 mm
Weight	4,700 kg
Capacity	18 litres

Distiller/decalcifier Ref. 100210

Simply fill the tank with tap water to get 4 litres of distilled water in around 5 hours. The cleaning of the tank is easy and quick. The water produced is very pure (between 2 and 10 mg/ litre of solid residue) and can be used in a large number of applications in the dental clinic and laboratory (autoclaves, creation of compounds, steam generating machines, etc.). The appliance is supplied with a 4-litre PVC tank, a set of activated carbon filters and a can of citric acid to clean the tank.

IMPORTANT- The water supplied for the appliance is "DISTILLED". However, it cannot be used for syringes, vials, cleaning wounds and generally any surgical application that requires TRI-DISTILLED purity.

Distiller cleaner refill (500 g.) **R-100210-01**

Spare still filters (6 u.) **R-100210-02**

365 mm
 280 mm
 250 mm  3,500 kg

Voltage	230 V 50/60 Hz
Power	580 W
Capacity	4 l.

 (L) 285 x (W) 285 x (H) 400 mm  5,068 kg

icanCLAVE

Autoclave D118-18 L
class B Ref. 100365

Features

- Class B 18-liter desktop autoclave.
- High quality internal components of Italian, Japanese and American brands.
- ODE valves.
- ULUAK vacuum pump.
- ULKA water pump.
- Ultra quiet (noise level below 70 dB).
- Triple fractionated vacuum system with an independent steam generator, which guarantees fast and safe sterilization cycles.
- High precision control system for perfect sterilization results (EN13060).
- Self-diagnosis with error codes.
- Fully automatic with pre-programmed sterilization cycles.
- Stainless steel chamber and door, with electro-polished finish.
- Open type water tank, which allows easy filling and cleaning.

Bacteriological Filter

Interface

- Very simple interface, which allows the professional to work safely for its easy handling, offering confidence to the clinics and their patients.
- LCD screen, which shows information about the cycle process: time, temperature, pressure, process alert.
- Different languages to choose from: Spanish, English, German, French, Italian, Dutch, Polish, Romanian, Czech, Latvian, Lithuanian, Hungarian and Chinese.

Sterilization control.

- Print the sterilization report and display available in several languages.
- Includes USB and printer.
- The data of the last 20 cycles can be automatically saved in the system and printed on your PC.

Security

- Test: Vacuum test / Bowie & Dick test / Helix test.
- Class B models include cycles for hollow loading type A and type B in addition to a specific cycle for prions.
- The double door protection system prevents the cycle from starting if the door is not locked correctly. This system also prevents the door from opening if the pressure inside the chamber is not equal to the atmospheric pressure outside the chamber.
- Pressure safety valve prevents overpressure in the chamber and steam generator.
- The power supply is automatically cut if there is a short circuit or an electrical fault capable of detecting and identifying the exact cause of any problem and issuing a specific error code to the operator.
- Water tank water level switch that controls the maximum and minimum water level.
- Automatic warning for maintenance.

safety lock

Regulations

- 93/42/EEC Health medical directive.
- 97/23/EEC Pressure Equipment Directive.
- EN13060 Small steam sterilizers.

Air purifiers

Family of air purifiers of three different sizes. They act on the stale air in any room, eliminating dust, dirt and germs. After the treatment, the air is much cleaner and more breathable. It should be emphasized that poor air quality favors the appearance of diseases, especially of a respiratory type.

The purification process begins with a battery of filters of three different levels: bacterial HEPA, activated carbon and photocatalytic. Subsequently, a high-performance UV lamp continues the cleaning work.

*** Purification is completed with ionization and the possibility of activating an ozone generator.** After the treatment, we can speak of a highly purified and quality air. There are three different sizes depending on the volume of the room to be treated.

Purifier 25 m²
Ref. 100510

Purifier 30-35 m²
Ref. 100512

Purifier 60-70 m²
Ref. 100514

UV cabinets

Family of UV sanitizers of three different sizes. The effectiveness of ultra violet rays is known to eliminate germs from any surface. In the field of hygiene, they are widely used in different sectors: the elements to be sanitized are introduced into the chamber where they will be subjected to UV light for a defined time. After the process, a good part of the microorganisms present will have disappeared.

Ref. 100500

Ideal for small objects such as mobile phones, masks, key rings, coins, jewelry, etc. Highly recommended for personal use. With drying function through heating resistance.

Ref. 100502

Medium-sized. Its camera allows to process the same type of articles as the previous model, but in greater quantity; or if you prefer, larger objects. Ideal for clinics and laboratories.

Ref. 100504

The interior of the cabinet is made entirely of easy-to-clean stainless steel. Contains 10 levels of trays in which instruments can be stored. The deposited elements will be subjected to the action of UV rays.

Reference	100500	100502	100504
Height	120 mm	300 mm	500 mm

Purifier / Nebulizer Ref. 100520

High efficiency purifier-nebulizer device, capable of atomizing the disinfectant solution creating a very fine mist that penetrates every corner.

- The droplet size can be adjusted, as well as the jet launch distance.
- Using the appropriate products, it is possible to efficiently disinfect large surfaces in just a few minutes (up to 100 m² in just 10 minutes).
- Its 5 l tank. allows spraying many square meters on a single charge.
- The reduced weight of the nebulizer - about 3 kg -, together with the practical banner tape that is included, allows a comfortable, efficient and safe use.
- The device is essential to disinfect medium-sized surfaces.

Height	250 mm
Length	570 mm
Width	335 mm
Weight	2,7 kg
Voltage	230 V. / 50 Hz.
Rated power	1.000 W
Capacity	5 l.
Spray volume	470 ml/ mi.
Droplet size	Ajustable 100um y 150 um
Launch range	Adjustable: 3-8 m.

Extraoral suction system Ref. 100347

Position the mouthpiece next to the patient's mouth and avoid the spread of all types of aerosols, particles in suspension, vapors and odors in the clinic. Greatly reduce the risk of cross contamination between professionals and patients and protect respiratory health.

Product description

- Two power levels.
- 2 filter cartridges composed of: Coarse filter for small particles.
- Active carbon filter. HEPA H13 filter.
- UV light.
- Plasma generator.
- Ergonomic shape and easy to move to have a good working position.
- Semi-rigid suction arm, self-supporting and easy to clean.
- Easy cleaning housing.
- Hours of use counter.*

Technical characteristics

- Two power levels (50-100%).
- Noise: ≤60 dB.
- Flow: 4000 L / min.
- Maximum vacuum: -25 kPa.
- UV lamp: 254 nm (approximate life 10000 h).
- Plasma generator: 5000 V (plasma 20000 h).
- Hepa grade: H13 (0.3 μm, > 99.97%).

* More than 12 h. continuous work without overheating.

SPECIFICATIONS

Height (arm not included)	755 mm
Width	330 mm
Depth	320 mm
Weight (arm included)	30 kg
Power supply	220 V, 50/60 Hz
Consumption	1000 W
Arm length	1,3 m.

*** Observation for maintenance:**
It is recommended to replace the filter element after one year of use.

Worktable (Kit) Ref. 100301 K2

- Metal table, wooden tabletop.
- Work chair.
- Polisher + 2 trays.
- Micromotor.
- LED lamp.

Ref. 100288-07
(Desktop stand)

Anodizing unit

**Solution of water (600 ml)
and sodium bicarbonate (20 g)**

Ref. 100295

This device allows you to process titanium dental elements quickly, easily and economically. The results are comparable to products belonging to a much higher category.

- ✓ Corrosion resistance.
- ✓ Wear resistance.
- ✓ Better adhesion and surface finish.
- ✓ Less release of metal ions.
- ✓ It works with a solution of water and sodium bicarbonate.

Dimension 207 x 245 x 160 mm
Weight: 2,73 kg
Voltage: 10-65 V
Power supply: AC220-240 V, 50/60 Hz
Power: 100 W
Anodizing time: 5 seconds

Appearance:

The anodic layer can be colored with different shades, giving the titanium a more attractive appearance than the original taupe.

Aspirations Sirocco

The modular nature of this range of aspiration units, provides solutions for clinic and laboratory, allowing the user to choose unit size, arm type, filtering system, etc.

The S model incorporates two stages of HEPA filtration. (high efficiency particle filter). Besides, an external micro-motor detection system and power adjustment in seven levels are also included.

The M and L models are sturdy aspirations, silent and highly reliable. The M is practical for use under the work table and the L (with a big capacity) for CAD/CAM aspiration systems. They incorporate an external connection to a micromotor and a milling machine that will allow to work synchronously with the unit.

- ✓ Motor de inducción (sin escobillas)
- ✓ Induction motor (brushless).
- ✓ Amazing suction power.
- ✓ Efficient low noise aspiration (55 dB).
- ✓ Easy removal and cleaning of the filters.

Sirocco S specifications

Height 135 mm • Width 280 mm • Depth 280 mm • Weight 3.1 kg • Power 350 W

Sirocco M specifications

Height 580 mm • Width 290 mm • Depth 330 mm • Weight 11 kg • Power 800 W

Sirocco L specifications

Height 800 mm • Width 290 mm • Depth 330 mm • Weight 13 kg • Power 800 W

Sirocco S with clinical working box
Ref. 080534AC

Sirocco M with flexible tube
Ref. 080536D1

Sirocco L with flexible tube
Ref. 080537D

Sense A7 - Induction

Ref. 100230

- ✓ Brushless motor.
- ✓ Manual or pedal speed control.
- ✓ Displayed speed.
- ✓ Right & Left turning ability.
- ✓ Overload protection function.
- ✓ Fault warning function.

Specifications
Dimension 185 x 175 x 128 mm
Weight: 4,27 kg
Maximum speed: 55000 rpm
Torque: 8.5 N-cm
Power: 240 W
Output voltage: 0-36 V
Handpiece weight: 230 g

Sense A3 - Brushes

Ref.: 100238 (white)

- ✓ Motor with brushes.
- ✓ Manual or pedal speed control.
- ✓ ON/OFF pedal.
- ✓ Displayed speed.
- ✓ Right & Left turning ability.
- ✓ Overload protection function.
- ✓ Fault warning function.

Specifications
Dimension 147 x 120 x 88 mm
Weight: 1,15 kg
Maximum speed: 35000 rpm
Torque: 3.0 N-cm
Power: 70 W
Voltage: 0-33 V
Handpiece weight: 215 g
Standard chuck: Ø2.35 mm

Also available
in graphite color
(ref.: 100240)

Sense A6 - Induction

Ref.: 100232 (white)

- ✓ Brushless motor.
- ✓ Manual or pedal speed control.
- ✓ Automatic speed maintenance function.
- ✓ High/Medium/Low speed.
- ✓ Displayed speed.
- ✓ Right & Left turning ability.
- ✓ Overload protection function.
- ✓ Fault warning function.

Specifications
Dimension 246 x 162 x 102 mm
Weight: 2,47 kg
Maximum speed: 55000 rpm
Torque: 8.0 N-cm
Power: 230 W
Voltage: 0-36 V
Handpiece weight: 240 g

Also available
in graphite color
(ref.: 100234)

Prime 221 - Induction

Ref.: 100236

- ✓ Brushless motor.
- ✓ Manual or pedal speed control.
- ✓ Displayed speed.
- ✓ Right & Left turning ability
- ✓ Overload protection function.
- ✓ Fault warning function.

Specifications
Dimension 191 x 130 x 90 mm
Weight: 2,8 kg
Maximum speed: 50000 rpm
Torque: 5.8 N-cm
Power: 120W
Voltage: 0-36 V
Handpiece weight: 205 g

TITAN 8 (ref. 100202)

Is the first option.
Distilled Water is loaded directly into the boiler.

TITAN AUTOFILL (ref. 100203)

It also has a pump to suck distilled water from an external bottle.

- ✓ Made of stainless steel with high quality components.
- ✓ Digital pressure switch.
- ✓ Full and lack of water indicator.
- ✓ Connection cable with built-in differential switch.
- ✓ Drain tap with safety lock.

Specifications 100202 and 100203
Height 36 cm
Width 27 cm
Depth 42 cm
Power 2200 W
Tensión 220 V, 50/60 Hz
Pressure 8 bar
Weight 12,5 kg
Boiler 3 L

Ref. 100202

Ref. 100203

Professional use

Additional Information: 100202, 100203, 100204

They are supplied with the following accessories:

- ✓ Power cord with built-in protection.
- ✓ Fine and long replacement nozzle.
- ✓ Replacement safety cap and 2 gaskets.
- ✓ Funnel and measuring cup (300 ml).

In models with direct connection to the water intake:

- ✓ Necessary hoses for water inlet/outlet connection.

Ref. 100202

- ✓ Manual filling.

Ref. 100203

- ✓ Manual filling.
- ✓ Autofill without previous cooling (**external bottle**).

Ref. 100204

- ✓ Manual filling.
- ✓ Autofill without previous cooling (**integrated tank**).
- ✓ Direct water net connection.

TITAN PLUS (ref. 100204)

Also has an internal tank for distilled water storage. You can load water into this extra tank without having to turn off the machine and wait for the pressure inside the boiler drops. Simply open the auxiliary tank cap and pour more water when you need it.

Safer and without interruptions.

Specifications 100204
Height 38 cm
Width 37 cm
Depth 45 cm
Power 2600 W
Tensión 220 V, 50/60 Hz
Pressure 4 - 8 bar
Weight 18 kg
Boiler 3 L
Auxiliary tank 2 L

Professional use

Front

Back

Finishing box *Eclipse* with built-in suction Ref. 080217

Box with similar features to the Eclipse finishing cabin (Ref. 080216), but with the particularity of integrating its own aspiration unit. Its small dimensions make it ideal in places with little space, where it is important to keep the environment clean without the need for bulky vacuum equipment. If necessary, it is possible to incorporate the machine to an external suction source.

Height	275 mm	Length	400 mm
Width	360 mm	Weight	2,8 kg

Capacity	3.5 L	5 L

Moderate use

Ultrasonic cleaning device Ref. 100162

Ultrasonic cleaning device for dental elements, with a UV lamp that is used to disinfect during cleaning. Its 28 W of power ensures excellent results. Its small dimensions make it suitable for home environments and travel. It also has a digital timer.

Height	122 mm	Depth	104 mm
Width	122 mm	Weight	2,8 kg
