

Finishing box ECLIPSE

Ref. 080216

FINISHING BOX ECLIPSE

Ref. 080216

After presenting with success of the **Eclipse** sandblasters and the Orion work box, some of our customers suggested that to complete **MESTRA's** extensive sandblasting family, an interesting product still needed to be developed: although the Eclipse range covers microblasting tasks and the Orion covers revision, the works of blasted with a gun independently were not adequately resolved.

Given the need, our engineers rushed to design this interesting camera that is halfway between the two previous products. As a result of your effort, we present you the cabin of review closed **Eclipse**. Their utility mix concept, efficiency, robustness, economy and simplicity. After the birth of Eclipse, now we can affirm with roundness and certainty that the **MESTRA** sandblasting family covers 100 percent of the needs of any professional in the dental sector, something that very few manufacturers can affirm.

The **Eclipse** closed review booth, combined with the microblasting minimodule Ref. 100122, it is perfect for removing cement from braces, generate micro-retentions in sandblasting surfaces and operations in general.

Especificaciones:

Dimensions 275 mm x 360 mm x 330 mm

Weight 2,8 kg • Voltage 230 V, 50/60 Hz

Lighting LED

Practicality

Rarely has a product been built for professionals in the dental sector with dimensions as accurate as those of the dental cabin **Eclipse** work.

Its size is small enough to fit any corner and wide enough to be able to work without constraints. Its weight allows easy movement, but maintains stability on the table. Practicality in the smallest space is the best definition we can give it.

Ergonomics

The working position has been carefully studied to achieve a comfortable product and functional. the generous viewing window, multi-point LED lighting that eliminates shadows while providing a color cast similar to sunlight... Working with **Eclipse** won't be heavy or tiring. Quite the contrary: the **Eclipse** work cabin adapts without problems to the needs of the dental professionals.

Efficiency

Its compact and closed design prevents dust from escaping. All the holes have been reduced to their minimum expression. Even the sleeve design access to the chamber minimizes leaks while resulting comfortable on a daily basis. The suction mouth -located in the place where it is least in the way- it is connected to an external aspiration at the rear by means of an adjustable socket. In addition, a tray attractive design separates dust and keeps the interior of the camera clean doing more nice work.

Quality

As with any other **MESTRA** product, when working with the **Eclipse** review booth, you can feel and verify the quality: the touch and texture of the materials, the precision of the fittings, the care of the details that are barely visible to the naked eye... all these aspects are what differentiate a product simply correct from another excellent.

The duration, reliability and job satisfaction is the reward they offer our products. All this complemented by the excellent after-sales service that we offer to our clients. With **MESTRA** you will never feel neglected.

Savings and design

When we talk about saving, we must not only contemplate the purchase price of a product. It is also necessary to take into account the maintenance and especially the reduction of times. You will find that with the **Eclipse** rework booth, both work and cleaning are simplified significantly, which translates into a considerable saving time and therefore money.

MESTRA products are always designed according to this philosophy. If we add to this its low acquisition cost, **Eclipse** is probably the best cabin option review present today in the market.

At **MESTRA** we are specialized in the manufacture and distribution of dental machinery and appliances. We are a Spanish company based in Bizkaia. We currently export to clients in more than fifty countries on five continents and we have more than a thousand references in our catalogue.

We have maintained a line of constant expansion since our foundation in 1945, thanks to our best qualities: the high quality of our products that have earned the ISO 9001:2015 certification by TÜV Rheinland, a close and attentive relationship with our customers, and a constant technical innovation in the design of our products.

Our design philosophy is based on three fundamental pillars: the needs of our clients, the observation of the techniques used in dental laboratories and our more than 77 years of experience providing creative and contemporary solutions to the daily problems of professionals in the sector.
